Control(4)

Control4 DS2 Info panel
C4-DS2IP

The **Info panel module** for the **DS2 Door Station** is used for displaying information for visitors of the building. Information can be inserted into the Info panel printed on plastic foil. Information is easily readable thanks to backlight. Backlighting intensity can be modified via the software.

- The module contains two bus connectors.

- These two connectors are fully interchangeable and can be used both as inputs from the main unit and outputs to other modules.

- If this module is the last one on the bus, one of the connectors remains unconnected.

- The module package includes an 8.22 inch (220 mm) long interconnecting cable.

See **ctrl4.co/ds2** for more information.
